### 4. FIRST AID PROCEDURES

- 4.1 INHALATION: Remove to fresh air. If breathing discomfort occurs and persists, see a medical doctor. If breathing has stopped, give artificial respiration. See medical doctor immediately. Mists and vapors can irritate nose, throat and lungs but will usually subside when exposure ceases.
- 4.2 EYE CONTACT: Immediately flush with water for at least 15 minutes, lifting upper and lower eyelids intermittently. Causes burns and may result in permanent injury to eyes including blindness. See a medical doctor immediately.
- 4.3 SKIN CONTACT: Remove contaminated clothing and thoroughly wash with soap and water. Wash affected with plenty of water and soap if available, for several minutes. Remove and clean contaminated clothing and shoes. Seek medical attention if irritation develops or persists. If irrigation occurs and persists, contact a physician.
- 4.4 INGESTION: Remove to fresh air. If breathing discomfort occurs and persists, see a medical doctor. If breathing has stopped, give artificial respiration. Give 3-4 glasses of water, but DO NOT induce vomiting. If vomiting occurs, give

### 5. FIRE FIGHTING MEASURES

5.1 FLAMMABLE PROPERTIES: 83° F (PMCC)

5.2 EXTINGUISHING MEDIA: Water spray, carbon dioxide, foam.  
Use media suitable for the material that is burning.

5.3 FIRE FIGHTING PROCEDURES: Move containers from area if it can be done safely. Cool fire-exposed containers with water from side. Use flooding quantities of water only. Use water spray to keep all containers cool. Fight fire from protected or removed distance. Chemical type extinguishers are not very effective. Use proper personal protective equipment and positive pressure self-contained breathing apparatus.

5.4 SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS: As in any fire, wear NIOSH/MSHA approved, pressure-

### 6. ACCIDENTAL RELEASE MEASURES

6.1 STEPS TO BE TAKEN IF MATERIAL IS SPILLED: Always approach spills from upwind. Small spills may be flushed to an approved sewer line with generous amounts of water (if approved by local and environmental agencies). For larger spills, dike well ahead of spill with non-reactive material such as sand. Spill may be neutralized with soda ash (sodium carbonate) broadcasted on surface. Use 1 to 1.5 lb. of soda ash for each gallon of spilled material. The resultant neutralized product will become carbon dioxide and water. Flush material with water and collect for disposal into plastic container. A flush to sewer may be allowed if approved by local authority. Dispose of in accordance with federal, state, or local laws. Combustible materials should be removed and/or rinsed with water to ensure all residual hydrogen peroxide is removed to the extent possible.

6.3 ENVIRONMENTAL PRECUTIONS: Do not allow undiluted material to enter storm or sanitary sewer systems. Dispose in accordance with state, local and federal laws.

6.4 OTHER PRECAUTIONS: Combustible material, such as cloth, wood or paper, exposed to hydrogen peroxide, an ingredient in this product, should be submerged in, or rinsed with large amounts of water immediately to ensure H<sub>2</sub>O<sub>2</sub> is neutralized. Failure to do this can result in fire.
