CAUTION: KEEP OUT OF REACH OF CHILDREN. MAY BE HARMFUL IF SWALLOWED. IN CASE OF CONTACT WITH EYES FLUSH WELL WITH WATER AND HAVE A PHYSICIAN CONTACT MANUFACTURER. IF SWALLOWED, CALL A PHYSICIAN.

SHAKE GROWERS' EDGE ULTRA™ THOROUGHLY PRIOR TO MIXING

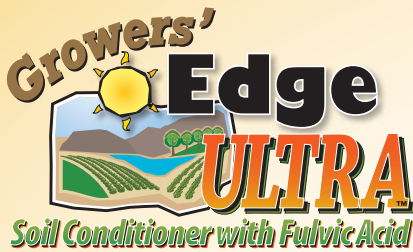

Product Description: Growers' Edge ULTRA™ is a unique blend of our patented Growers' Edge™ soil treatment and the high purity, concentrated Fulvic Acid fraction from Humic Acid. Together in the proper ratio, the components create a unique synergistic activity which provides unmatched ionic soil conditioning, the transport and holding of nutrients in the critical root zone, and the proven enhancement of cationic exchange, soil aggregate formation and micro nutrient complexing that Fulvic Acid provides. This formula maximizes the soil's performance at the root and is an excellent source of long-lasting complex carbons.

Application: Growers' Edge ULTRA™ may be tank mixed or injected. Typical application for agricultural/citrus crops: Initial treatment rate of .75-1.5 gallons to the planted acre with follow up treatments of 1/2 gallon/acre every 90 days of crop production. Growers' Edge ULTRA™ can be tank mixed for spray or drench applications. Use at a rate of 1 gallon Growers' Edge ULTRA™ per 500 gallons of spray solution. Always add Growers' Edge ULTRA™ to water first for maximum fulvic benefits.

For optimum results, make sure ground is moist before initial treatment followed by at least 1/10" water after initial treatment.

Breakthrough Soil Conditioner with the Benefit of Fulvic Acid for Agricultural & Horticultural Use
