

MAGIC KLEEN™

Foliage Cleaner Concentrate

Removes mineral and fertilizer spotting from foliage and allows the plant's natural beauty to shine through

DIRECTIONS FOR USE: Mix 1 part of Magic Kleen concentrate with 25 parts of clean water (5.1 oz to 1 gallon of water) for cleaning applications on most species of plants. More sensitive plants may require dilutions of 1:50 (2.6 oz to 1 gallon of water) or greater. Although we have successfully tested Magic Kleen at different concentrations with many varieties of plants, always test a small num-

ber of plants and monitor results for several days before applying to large populations. Apply to plant with sprayer, thoroughly wetting foliage to runoff. In certain applications with sensitive plants it is suggested to wash the plant with clean water after Magic Kleen removes the stains. **Always avoid direct application on blooms.** Allow to air dry. May be used in direct sun applications.

CAUTION: Always pre-test this product on sample plants and containers for compatibility and other effects before using on large numbers.

DANGER: Keep away from children. Do not drink. Use appropriate eye and safety protection when handling.
