

LEGENDARY, PLUG-FREE PERFORMANCE **PLUS** ROOT ZONE TARGETING WITH SUPERIOR NUTRIENT/WATER UPTAKE

Matrix Plus™ Is the Legendary Matrix 2™ Pre-Mixed with Our Ground Breaking and Proven Growers' Edge.™ Get One-Step Convenience with One Product that Keeps Your Irrigation Clean, While Also Helping to Maximize Growth and Crop Production.

Matrix 2™

- Most cost-effective product to remove and prevent plugging in low-volume irrigation systems
- 5th generation amines and Phosphonate Chemistries
- Used at Low Usage Rates
- Makes water more suitable for free-flowing operation

Growers' Edge™

- Patent-pending soil conditioner
- Uniformly retains water and nutrients in the critical root zone
- Allows optimum uptake of water and nutrients
- Changes nature of soil in root zone from hydrophobic to hydrophilic

APPLICATION INFORMATION

DRIP TAPE: For crops such as strawberries, tomatoes, cucumbers, peppers, etc. Based on water quality analysis for emitter treatment, typical feed rates of 5 - 12 ppm of product yields a range of 0.4 to 0.9 gallon per planted acre of Growers' Edge for a typical 90 days growing cycle.

MICRO JET: For use with crops such as citrus, blueberries, tree farms, etc. Based on water quality analysis for jet treatment, typical feed rates of 4 - 9 ppm of product yields a range of 0.35 to 0.8 gallon per planted acre of Growers' Edge for a typical 120 days water cycle.

SUB SURFACE POLY DRIP: For use in permanent low flow irrigation systems and specialty applications. Based on water quality analysis for emitter treatment, typical feed rates of 4 - 10 ppm of product yields a range of 0.35 to 0.85 gallon per planted acre of Growers' Edge.

Available and Ready to Use in Various Sizes : ☐ 30 Gallon Drum ☐ 55 Gallon Drum ☐ 265 Gallon MBT (Tote)

Matrix Plus™ is NOT an EPA Registered Product.
No claims are made for this product in that regard.
