

**Super Concentrated Soap
for Safe Washing of
Fruits & Vegetables**

The NEW POWER WASH for Produce!

FLO-TEC Inc. has developed a new, exceptionally powerful soap cleaner - *AG Wash*™. It is designed to safely, gently, but very thoroughly, remove the highest levels of soil and organic dirt loads, leaving you with clean fruits and vegetables. *AG Wash*™ is compatible with many fungicides /bactericides.* When used together, they provide an additional food safety benefit and protection from many bacterial food pathogens.

AG Wash™ is very effective as a foliar spray, with foam washers, in flumes and dump tanks, or applied with low pressure spray nozzles. It is unique not only because of its strength and versatility, but because *AG Wash*™ was designed to be used in combination with *Peroxy Punch*™, our EPA approved sanitizing product. This mix is a great option for cleaning heavy organic/soil loads, AND for providing a highly effective sanitizing treatment. As a step in your food safety program, *AG Wash*™ and *Peroxy Punch*™ provide unsurpassed food safety protection against microbial pathogens that can be present on fruits and vegetables.

DIRECTIONS FOR USE:

As a foliar spray for in-field use, dilute 12.5 to 37.5 fl. ozs. per 100 gallons of fresh water. Rinse is not necessary. In foam washers, spraying systems or dump tanks, dilute .15 oz. - .4 oz. of *AG Wash*™ with 1 gallon of fresh water. Foam, spray or submerge dilution with the fruit/vegetables for a minimum of 15 to 30 seconds. Rinse the fruit or vegetables thoroughly with fresh water. For fruit or vegetables that are hard to clean, using a higher concentration for satisfactory cleaning is permissible. *AG Wash*™ may be used on most all fruit and vegetables as part of the post harvest cleaning process, and may also be used to create foam in any commercial foam application.

*This NEW Soap Concentrate is ideal for the cleaning
of heavily soiled, field grown fruits and vegetables,
helping you save time, effort and expense.*
